DEFENCE AVIATION SOFTWARE SYMPOSIUM

Event Information

The Defence Aviation Software Symposium is the premier forum for military Aviation Software safety in Australasia. The theme for the 2019 Defence Aviation Software Symposium will be ‘Software Assurance under DASRs: Challenges and Good Practice.’

The Symposium will focus on the Practical application of Software Assurance within the Defence Aviation Safety Framework. The Symposium aims to promote good practice within the regulated community and provide a forum for robust discussion of DASA expectations, policy, emerging issues and good practice within the regulated community.

Target Audience

The Symposium is targeted at all Commonwealth and industry personnel involved in the development, acquisition, certification, and in-service management of Aviation Software for ADF applications; as well as interested representatives from foreign military forces, science and technology organisations, research and development centres, airworthiness regulators, and academia.

Call for Presentations

We invite all members of the software community to share their experiences, in line with the proposed theme and focus, with topics of interest or concern. Proposed presentation topics should be communicated to FLTLT Adam Borgh (adam.borgh@defence.gov.au). Proposals for presentations are to be submitted by COB 31 May 2019 for consideration.
