

Response provided to journalist
05 August 2016

QUESTION

Hoping to grab the results of the contamination tests at the Edinburgh RAAF base as well as information on any further action being taken, if possible, please?
The department was to receive the results by the end of July.

RESPONSE

After consultation with the SA Environmental Protection Agency and Salisbury City Council, Defence will undertake a detailed environmental investigation to determine the nature and extent of PFAS contamination on and in the vicinity of RAAF Base Edinburgh. Planning for this investigation has already begun and details of this program will be communicated to the community shortly.
