

Questions:

I was just hoping to find out some more information about PFC testing at the Edinburgh RAAF base.

1. When are test results expected?
2. Has there been any update on the matter in the past month?

Response:

Defence is working with the SA Environment Protection Authority and the Salisbury Council to determine the next steps. To date, discussions have been primarily based upon the nature and characteristics of any future investigations, and seeking agreement on the focus of future investigations including issues such as location.
