

Questions:

1) Just wondering whether the Defence Department has received the PFOS and PFOA test results for the Edinburgh RAAF base yet and if so, what were the results? And what are the next steps?

Response:

Defence is continuing to work with the SA Environment Protection Authority and the Salisbury Council to determine the next steps. To date, discussions have been primarily based upon the nature and characteristics of any future investigations, and seeking agreement on the focus of future investigations including issues such as location.

Once next steps are determined, Defence will undertake engagement with the community to provide further information on the environmental investigations.
