

1. Is there a standing contract between Defence and Townsville and Darwin airports that allows them to use this firefighting foam?

2. How long does this contract last?

There are agreements between Air Services Australia and Defence for the provision of Fire Fighting services at RAAF Darwin and RAAF Townsville. The agreements last until September 2025 for RAAF Darwin and March 2019 for RAAF Townsville.

Both agreements require Air Services Australia to utilise AFFF approved by Defence, the current AFFF used is Ansulite.
