In light of the water contamination from the Aviation Army Base in Oakey, has Defence warned Oakey primary producers not to consume their own livestock or produce?

Advice on the consumption of livestock and produce is a matter for the Queensland Department of Health.

A wide variety of food types, including fruit and vegetables, will be analysed as part of Defence's comprehensive Human Health Risk Assessment for Army Aviation Centre – Oakey, due for public release in mid-August 2016.
