

**Questions:**

Last week Defence's Steve Grzeskowiak told us he was meeting with the NT's Power and Water Corporation on Tuesday of last week to discuss a new much large water treatment plant for Katherine.

Is there an update on that meeting?

Has the new plant been ordered?

When is it likely to arrive?

**Response:**

Representatives from Defence and Power and Water Corporation met on Tuesday 19 June 2018 in Darwin to discuss the long-term water supply strategy, including identifying ongoing support Defence may provide.

Questions about contractual arrangements for a new plant should be directed to Power & Water Corporation.
