Members with dependents unaccompanied

Sometimes, when a military member is posted, families may choose to remain in their current location while the military member moves alone to their new posting. When families choose to live apart in this way, it is called “Member With Dependents Unaccompanied” and is often referred to by the military as “MWDU” or “MWDU”.

Families choose this option for a range of reasons that support family stability. For example, “going MWDU” allows partners to keep their current job, children to stay at their school, and family members to maintain consistent access to healthcare.

Choosing to go MWDU is an important family decision. Families should research the new posting location and discuss the implications of living apart and its possible affect each family member before coming to a decision.

The polices governing MWDU and its accompanying entitlements are described in Chapter 8 of Defence’s Pay and Conditions Manual. You should read this chapter thoroughly before choosing to go MWDU.

This worksheet raises issues for you and your family to discuss when you are together thinking about MWDU as an option.

Why are you and your family considering MWDU?
