

The International Global Navigation Satellite Systems (IGNSS) Society  
is pleased to announce the

# IGNSS 2007

4 - 6 December 2007  
University of  
New South Wales,  
Sydney Australia

## Symposium & Exhibition

The School of Surveying & Spatial Information Systems (SSIS), at the University of New South Wales (UNSW), is proud to co-host the 2007 symposium in the beautiful harbourside city of Sydney.

The program will include updates on all the major satellite systems, keynote presentations, interactive poster sessions, panel sessions, supplier forums and an informative trade exhibition.

The list of topics includes but is not limited to:

1. positioning trends
2. navigation systems and applications
3. inertial systems
4. precise timing
5. receiver technology
6. signal interference and multipath
7. space based & ground based augmentation
8. location technology for consumer applications
9. integrated systems
10. transport telematics
11. location-based services

12. GPS/ GNSS applications in aviation
13. surveying
14. mapping
15. geodesy
16. agriculture
17. other

Updates regarding the conference will be posted to the website at [www.ignss.org](http://www.ignss.org)
