Notes:

- ADFPAY users can view member records on ADFPAY during GORPS implementation when system is available. Users are not to be concerned if they see debts for members in the 1st week of implementation as certain transactions are backed out before the 2nd load file is applied and these transactions are reapplied afterwards.
- Users are not to input HDA transactions during implementation periods on ADFPAY.
- Discharge computes will not be run during system down times.
- System down times may be extended, if required. Users can check system availability on the ADF Payroll website <http://intranet.defence.gov.au/dsg/sites/MilitaryPayrollSystems/>
- DEFPAC correct rejects on ADFPAY and Services correct errors on PMKeyS between 1st and 2nd load files.
- Dates for RAAF and Army are not to be published at this time. RAAF to be published after we see how Navy goes, and Army once we see how RAAF
