This newsletter advises ADF members about the development of the next Workplace Remuneration Arrangement (WRA).

The WRA information presentations conducted during June were attended by approximately 3,000 ADF personnel.

The presentations provided an overview of the ADF remuneration process, the nature of the Defence Employment Offer and provided the opportunity for ADF members to comment on the development of the productivity principals.

During the presentations a number of common productivity and efficiency initiatives were identified by ADF members and included:

- Review and simplification of allowance entitlements
- Travel administration processes

The WRA team are now compiling the common productivity and efficiency initiatives identified by ADF members. Productivity savings will form the basis for pay increase options to be presented at the Chiefs of Service Committee (COSC) scheduled for August.

Once the WRA proposal is endorsed, CDF will release a signal to all ADF members advising the details.
