Dear Sir.

In case you wish to contact me between the 18/07/08 and 4/08/08. I will be in Western Australia staying with my son   

A matter came to mind thinking about this sad business.

I believe at this time her below decks would have been covered with Cortisene ? a thick brown linoleum like material which was found to burn with a dense black smoke, I believe it was ripped out of all ships after the HMAS Canberra was lost.

Yours Sincerely

I. Farquhar-Smith
