**Subject:** Fw: 2 pictures for you

Good Morning

I was wondering if you can explain the apparent deletions in the two attached photographs of the Sydney lifeboats. There seem to be three sections, ie the top of the far boat, inside the closer boat, and the shadow to the left foreground of the closer boat ??

The photographs have been sent to the IT manager and to Ted Graham who have both denied knowing anything about it. However, Richard Sojka the IT manager has stated the photographs were published as received from the Geosounder. Why have there been deletions to these photographs ? Have any other alterations been made to any of the photographs and why have more been released ? There is a growing clamour among relatives that the failure to release more footage and pics is scandalous.

Jim Eagles
