Subject: WWW Submission: 5. Other Defence Capabilities [SEC=UNCLASSIFIED]

Name: Nathan

Submission: All too often we hear of Defence projects buying new capabilities that dont talk to or work other the capabilities. The Department of Defence needs to mandate certain minimum capabilities that all like platforms or assets need to have. I read an article that said that the Tiger helicopter didnt have the same datalink as the Hornet or that new Wedgetail. Why is that? i thought he primary reason to have a defnce force was to defend Australia. Aircraft that don work with eachother wont do that job well.

I agree to my submission being published on the Defence website

I agree to my submission being quoted in the Community Consultation Report
