**To:** White Paper  
**Subject:** SEC: UNCLASSIFIED WWW enquiry: Submission: 8. Defence Industry

Name: David G Peet

Submission: As a method of freeing up oil supplies and reducing our dependency on importing oil Australia via the proposed Commonwealth Oil and Gas Corporation should be installing the SASOL coal to oil plant in at least two areas of Australia being Collie and Mackay the SASOL plant using 120000 tons of coal per day can produce 160000 barrels of oil per day. These plants are essential to the Australian Defence Industry and Service.

Using some of our coal resources for this fuel will remove the necessity of crop and plant loss for biofuels. Other nations are using this method of fuel supply and installing these plants for fuel supply.

I agree to my submission being published on the Defence website

I agree to my submission being quoted in the Community Consultation Report
