Name: Peter Tuckey

Submission: What role of the Australian defence should play;The roles of the defence force are vital to the defence and offence of Australia.But at the same time able to give a disaster relief and logistic support to our troops.And at the same time able to protect our boarders from illegal fishing and dealings.We should be hand in hand with USA.

If we are to be a powerful contender in our region we need a navy that can do all operations and with force and numbers of greater capability.And airforce that can be gobal to at least 12 operations.As well in logistic,relief,and combat.An Army that can be put any where in the world and with the logistic,and releif, combat capability,as well with air support at least to 12 operation at one time.

it is vital that Australia can do this because we have a multinational country,the saying we are many ,but we are one is so true.So we should act as one body to all nations,but don't forget our partners like New Zealand and USA,UK.It is right that we play a international role in keeping peace,defence of Australia,relief where needed.

What kinds of armed forces should we develop;Our forces have to be structured to all operations and with larger capability than we have now.We need to have structure in our navy,airforce,army to the operation of being a unit that can moblize in short peruiods of time,as well able resupply and have good combat reaction time to any given operation.we should able to handle more than two operations at once.Small operations we should be able to handle up to 9 at one time.

Large operations 3.

Structuring is to able to defend and attack and support all at the same time in operations.A country like Australia must able to do this.

We can do this buy making our forces larger and more multirole,and standardisation.But at the same time have high technology.This is the key our forces future.

This is my operational structure for the Australian defence force.It covers all operations and forces needs until 2028.

Airforce;Combat aircraft is hard to standardise,we will need at least 2/3 type of capability.

Fighters-JSF=75,Super Hornet=48,F-22=60,Now F/A-18A/B=71/,SUPERHORNET=48,F-111=12.

Air lift-C-17=6,C-130J=15,A330 MRTT-7,SPARTAN C-27J=12.

Recon-AEW&C-4,P-3Orion.

Training- Hawk=33,PC-21=50,Beech-300=8.

By keeping super hornets and adding JSF and F-22 will increase combat capability fighters to 183fighters for our airforce which we could afford.

NAVY; The key is a three Fleet structure and navy home guard to defend and attack and logistics.

Fleet structurex3;Capabilites needed.

Anzac Frigates=10,Corvettes new type Visby corvettes=10,destroyers=4.

COLLINS-6,Collins v2=6.

Amphibious ships-small-8000tons=3Enforcer,medium-11000tons=1Enforcer,large tenix design=2,with ski jump for 25 jsf fighters.

Perry Adelaide class keep until destroyers are in service.

replenishment=3.

FLEET EXAMPLE;1x3

3 ANZAC Frigates,3 Corvettes,1 small amphubious ship,1 large amphibious.1

replenisher,2 collins,1 adelaide class/destroyer,2 collins v2.fighters=25,helos=16X3-MRH-90,TIGER-6X3,S-70B=4.

Home guard fleet.

Example1x4;

3 patrol boats,2 mine boats.AS-350BA-3.

The extra numbers are for maintanance rotation,or extra units for large operations.

Army,

I think where only short on helicopters and tanks for naval and land operations.

These are the numbers we need.

Tanks -110,attack helicopter-48,support helicopters types- chinook-47d/f=18,MRH-90=70.

Black hawk=24 Reserves.

This capabilities plan we could afford will cost us around max of 80 billion which is cost effective, and really, I think added to about 68 billion. We can afford a plan like this and can achieve reasonable goals in all operation and able us to move ourselves quickly. Using a defence structure of four point platform, and standardisation as much as possible.

Future plans like subs, and additional fighters in consideration for 2025 is needed for sure, but we must think of today, then worry about tomorrow ten years down the track.

I hope this shows how we can improve defence. I hope this is what you want.
