Executive Summary

The Department of Defence (Defence) has established the One Defence Data Program (the Program) to ensure Defence becomes a more data-informed organisation that better leverages information and data for strategic and operational advantage. KPMG Australia Technology Solutions Pty Limited and its consortium (Team KPMG) has been selected as the preferred Systems Integration supplier for Tranche 1 of the Program. KPMG Australia Technology Solutions Pty Limited is a wholly owned and controlled subsidiary and affiliate of KPMG, an Australian partnership.

The overall value of Tranche 1 of the Program is \$233M AUD, of which approximately \$86M will be delivered by Australian Industry. Work will commence under this contract from May 2022, and Tranche 1 delivery is expected across a two-year horizon. Service delivery locations are in Canberra and Melbourne, in both KPMG offices and Defence establishments as directed by the Commonwealth.

The work packages scope of work to be delivered under this contract include:

- **Enterprise Decision Support:** Establishment of an Enterprise Decision Support Factory to lead integrated development of use cases
- **Master Data Management:** Leverage Oracle Master Data Management capability with Alation data catalogue
- **Data Archiving:** Deploy as a capability on Information Management Platform leveraging Strategic Data Platform and related capabilities
- **Strategic Data Platform:** Microsoft Azure based services leveraging cloud at

KPMG Australia Technology Solutions Pty Limited is an affiliate of KPMG. ©2022 KPMG, an Australian partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. Protected and Secret levels

- **Business Intelligence & Analytics:** Leverage Microsoft capabilities focusing on Power BI for data exploration and visualisation and supporting Azure services with support for existing Defence capabilities
- **Discovery Platform:** Microsoft Azure based services leveraging cloud at Protected and Secret levels
- **People Processes & Data:** Consolidated services providing delivery of change management, training and data literacy, and data governance and architecture
- **Sustainment:** Sustainment organisation for capabilities delivered as part of One Defence Data Program Tranche 1, including environment management capabilities
- **Common Services:** Consolidated centralised support across all work packages, providing specific services across Project and Program Management, Technical Services, Commercial Services and Strategic Roadmap and Operating Model design services.

The Australian Industry Participation in the Program are as follows:

Australian Company	Activity Description	Location
KPMG Australia Technology Solutions Pty Limited (KTech)	Systems Integrator	Canberra, ACT Melbourne, ACT
archTIS Limited	Provision of architecture, security support, and software solutions.	Canberra, ACT
Epicon IT Solutions Pty Ltd	Sustainment of Program technical and environment capabilities.	Canberra, ACT

To deliver a responsive and flexible workforce capable of meeting the Program’s evolving needs, Team KPMG is partnering with Australian Small to Medium Enterprises (SMEs) including Penten, Teradata, Greenlight, Digital 61, and Sisu Solutions in a team augmentation capacity, to ensure the Program has access to the right resources throughout Tranche 1 and represent Australian industry capability solutions.

Our global consortium partners include:

- Oracle: provision of support to Master Data Management work scope and supporting the capability delivered through the Strategic Data Platform;

- BAE AI: support the management of the DevSecOps pipelines and provide NiFi development capability and Cross Domain Solution expertise; and
- Microsoft: provision of materials to be incorporated into the solution.

Team KPMG is committed to transferring global knowledge and skills to Australian industry and will work with our global partners to use the Program as a vehicle to transfer skills and capability to Australian SMEs and facilitate training opportunities to develop formal technology qualifications.

Scope of Future Work Opportunities

As part of the market engagement activities, Team KPMG will establish a regular forum for engagement with the existing SME supply chain and SMEs. The forums will be designed as six-monthly workshops, to brief the SME supply chain on future Program work activities, operating model and Program focus areas. The workshops and briefing activities will be followed by opportunities for SMEs to provide a capability brief to the Program. The workshops and briefing activities will be collaborative exchanges and include coaching and mentoring to SMEs on Defence engagement.

Team KPMG seeks to support growth in the technology industry through key sponsorships enabling innovative approaches to challenges. Team KPMG will provide access to accelerators, innovation programs, and strategy consulting, to support the Program to develop, maintain and enhance skills, knowledge, systems, and infrastructure (where appropriate) within Australian Industry.

Future Opportunities Industry Engagement

The guiding principles for all formal Industry engagement will be:

- Targeted through market scans to identify potential Australian suppliers.
- Select and assigns 'best-of-breed' suppliers relevant to their area of expertise.
- Provide a framework, processes and targets for knowledge and technology transfer from Team KPMG to identified Australian suppliers to increase capability individually and collectively, where appropriate.
- Prioritise Australian suppliers with Indigenous organisational representation.

As the System Integrator to the Program, Team KPMG is committed to combining best practice industry standards with experience, to quickly augment and build the capacity required. To ensure the Program has ongoing access to 'best of breed' organisations from across Australian Industry, an annual market scan will be conducted to identify appropriate SMEs and suppliers:
