**Discussion Points**

- What's unique about the alliance between the United States and Australia is that the treaty that underpins it is less a piece of paper than it is a network of people, one that spans government, defence, intelligence, the arts, academia and business.
- The people gathered here today demonstrate that truth.
  - Applaud the work of Scale Facilitation to deepen that network further.
- The nearby 9/11 Memorial is a reminder of the significance of this site, and of the sacrifice made by many Americans and Australians, often fighting alongside each other, to protect our nations from threats.
  - So it's incredibly fitting for Scale Facilitation to establish a veterans' lounge for Australian and US veterans and their families.
- Amid a deteriorating strategic environment, the innovation in and between our defence industries, enabled by streamlined industrial and capability collaboration, will be vital to our capability edge.
  - Value your support for this Alliance priority.
