## Declaration of Accuracy

In making this declaration, I am aware that sections 490 and 491 of the *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) make it an offence in certain circumstances to knowingly provide false or misleading information or documents. The offence is punishable on conviction by imprisonment or a fine, or both. I declare that all the information and documentation supporting this compliance report is true and correct in every particular. I am authorised to bind the approval holder to this declaration and that I have no knowledge of that authorisation being revoked at the time of making this declaration.

**Signed**

# 1. Description of Activities

To conduct flying operations of the F-35A Lightning II aircraft at RAAF Base Williamtown and Salt Ash Air Weapons Range in New South Wales, RAAF Base Tindal in the Northern Territory and other secondary urban locations around Australia.

RAAF Bases Williamtown and Tindal will be the main operating bases (MOBs) where the F-35A Lightning II fleet will be based. The F-35A Lightning II fleet will deploy periodically to five forward operating bases (FOBs), 14 Air Weapons Ranges (AWRs) and exercise areas located across Australia to conduct operations and training. This includes the FOBs at RAAF Bases Darwin, Townsville, Amberley, Edinburgh and Pearce. The locations of the MOBs, FOBs and AWRs are detailed in Figure 1 of the Referral for the Flying Operations of the F-35A Joint Strike Fighter (EPBC Act 2010/5747), dated 19 November 2010.

This action was approved under the EPBC Act, subject to conditions of approval issued by the (now) Department of the Climate Change, Energy, the Environment and Water (DCCEEW), on 10 July 2015. The Action commenced on 10 December 2018.

Condition 7 of the EPBC Act approval requires Defence to publish a report on its website within three months of every 12-month anniversary of the commencement of the action to address compliance with each of the conditions of the approval, including implementation of any management plans, reports and strategies as specified in the conditions.

The approval has an expiry date of 1 June 2065.

2. Conditions of Approval

Table 1 – Compliance Table

| Condition Number / Reference | Condition                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Is the project compliant with this condition? | Evidence / Comments                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1                            | Ensure, during the transition period, aircraft noise levels at sensitive receptors at RAAF Bases(s) do not exceed the F-35A Lightning II aircraft noise levels predicted in the Environmental Impact Statement. During the transition period monitoring must be undertaken, reported biennially to the Department, and, if noise levels exceed the F-35A Lightning II aircraft noise levels predicted in the Environmental Impact Statement, then corrective measures must be developed and implemented, until agreed in writing by the Minister. | Compliant                                     | <p>The action commenced on 10 December 2018 and the transition from F/A-18 A/B Classic Hornets to F-35A Lightning II was complete in December 2021. Throughout 2023, F-35A Lightning II aircraft operated predominantly from the main operating bases at RAAF Base Williamtown (WLM) and RAAF Base Tindal. In accordance with the approved RAAF Base Williamtown Base Aircraft Noise Management Plan (BANMP) and (Enclosure 1) F-35A Noise and Flight Activity Verification Program (NFAVP), the following has occurred:</p> <p>During the transition period from F/A-18A/B Classic Hornets to F-35A Lightning II aircraft, from 2018 to 2022, the F-35A NFAVP monitored and assessed aircraft noise levels.</p> <p>Defence validated the EIS predicted noise and flight activity levels against actual F-35A flight data using the Defence Noise and Flight Path Monitoring System (NFPMS) as F-35A aircraft numbers continued to build. The noise monitoring system has coverage across a wide area near RAAF Base WLM including Salt Ash Air Weapons Range operations and a number of sensitive receiver sites.</p> <p>There is a requirement to produce an annual compliance report (this report) and two biennial reports to comply with the Conditions of Approval for the flying operations of the F-35A Lightning II. The first two reports assessed and compared actual F-35A Lightning II noise levels with predictions in the Referral Environmental Impact Statement (EIS) (among other elements of the conditions of approval). These reports were drafted based on results of the first two years of the transition period (December 2018 to December 2020, inclusive). The F-35A Biennial Reporting - Noise and Flight Path Monitoring System Review (Dec 2018-Dec 2020) report addresses <i>Condition 1, Condition 3, 3.b., 3.c.i.; 3.c.ii.; 3.c.iii.; 3.c.iv.; 3.e.i; 3.f.; 3.f.iv.</i></p> <p>The second report Noise and Flight Path Activity (January 2021 – December 2022) was produced and submitted to DCCEEW in July 2023. The second Noise and Flight Path Activity January 2021 - December 2022 report addresses <i>Condition 1; Condition 3.a.; 3.c., 3.e.ii; 3.ii.i;3.e.ii.ii; 3.e.ii.ii.a);b.)c); d)</i> of the approval decision.</p> <p>Please refer to <a href="#">Flying operations of F-35A aircraft   About   Defence</a> to view the documents.</p> <p>The F-35A Noise and Flight Path Activity January 2021 - December 2022 report identified flying operations and noise level changes associated with the F-35A aircraft were generally consistent with the EIS. The approval condition relating to thrust settings at take-off (M07) is unable to be complied with for safety reasons. In this instance, predictive modelling of take-off conditions used in the EIS were not replicated in actual flying operations and higher thrust settings must be used. As a result of the requirement for higher departure thrust settings, higher than predicted noise levels are associated with these operations in close proximity to the Base.</p> |

|                              |                                                                                                                                                                                                                                                                                                                               |                                               | <p>Air Combat Group (ACG) trialled alternative departure procedures at RAAF Base WLM from mid-2019. The aim of the trials was to identify procedures that do not compromise the safe operation of the F-35A aircraft, the safety of the public and aircrew, and minimise noise at sensitive receivers, while still achieving training and operational requirements.</p> <p>Noise monitoring as reported in the Noise and Flight Path Activity 2021/22 Report, indicated flying operations and noise levels associated with the F-35A aircraft are generally consistent with the findings of the EIS. However there were some instances of higher measured noise levels around RAAF Base WLM, summarised as follows:</p> <ul style="list-style-type: none"> <li>At locations around Raymond Terrace, F-35A aircraft noise levels were higher than the EIS predictions in 2021-22. However, they were lower than the previous biennial report period (2019-20), demonstrating that changes to the departure profiles aimed at increasing the altitude of departing aircraft were successful. This activity has resulted in noise levels that are comparable to previous measured F/A-18A/B Hornet noise levels; and</li> <li>In areas east of the base, F-35A aircraft arrival noise levels were higher than the EIS predictions. This finding was also a feature of the previous biennial report period (2019-20). F/A-18A/B Hornet measured noise levels were also higher than EIS predictions. Accordingly, this can be attributed to a systematic difference between the way arrivals occur in practice and that the modelling of these procedures in the EIS. It should be noted that the number of aircraft arrivals in these areas is relatively low.</li> </ul> <p>In accordance with the RAAF Base WLM BANMP, Defence bedded down the corrective measures in 2022-23. Standard operating procedures are to be finalised in 2023/24 as per the approved RAAF Base WLM BANMP F-35A NFAVP and once all aircrafts are introduced into service. Please see <a href="#">Air bases   About   Defence</a>, go to Williamtown, or other relevant bases such as Tindal, Darwin, Townsville and Amberley.</p> <p>Compliance with this condition is supported by actions taken to satisfy conditions 2, 3 and 4.</p> |

|                              | <p>a) Comparison of actual flight activity of F-35A Lightning II aircraft with those predicted in the Environmental Impact Statement;</p> <p>b) A review of existing noise management programmes;</p> <p>c) Monitoring, to validate predicted noise impacts to sensitive receptors at RAAF Base Williamtown (including Salt Ash Air Weapons Range), RAAF Base Tindal and RAAF Base Townsville.</p> <p>This must include, but not be limited to:</p> <ol style="list-style-type: none"> <li>An investigation of alternative noise measurement and analysis methods;</li> <li>Utilisation of Noise and Flight Path Monitoring Systems (where installed), to provide ongoing noise information, and the development of a noise measuring system at RAAF Base Tindal;</li> <li>Comparison of actual measured F-35A Lightning II</li> </ol> |                                               | <p>on completion. The BANMPs are reviewed annually by a Senior Australian Defence Force Officer at each base and can be located on the Defence Aircraft Noise website see link – <a href="#">Defence Aircraft Noise: Department of Defence</a>.</p> <p>BANMPs include measures to align with Condition 3 where applicable. Activities undertaken to inform the Condition 3 measures include:</p> <p>3a: Flight activity is documented in the biennial noise report F-35A Noise and Flight Path Activity January 2021 - December 2022 and includes a comparison of flight activity with EIS predictions for RAAF Base WLM. See Pages 16 to 60; Sections 4.1 to 4.10.3 for details. The summary of flying activity is detailed in section 4.11, pages 61-62.</p> <p>Flight activity for the period January 2021 to December 2022 indicates fewer F-35A aircraft movements occurred during the reporting period than presented in the EIS. This is expected given there were fewer F-35A aircraft operating than considered in the EIS, which was based on a forecast year 2025 when all F-35A aircraft would have been delivered and at Full Operating Capability (FOC).</p> <p>3b: A review of existing noise management programmes at RAAF Base WLM was conducted as part of the biennial review - F-35A Biennial Reporting - Noise and Flight Path Monitoring System Review 2018-20 Pages 9-12; Section 3.1 to 3.1.5. In summary, the report found that noise management programs were appropriately addressing community impacts from aircraft noise.</p> <p>The biennial reporting for 2021-22 incorporated F-35A Lightning II operations at RAAF Bases Tindal, Darwin, Townsville and Amberley.</p> <p>3c: The F-35A Noise and Flight Path Activity January 2021 - December 2022 includes monitoring data to validate predicted noise at sensitive receptors. F-35A Noise and Flight Path Activity January 2021 - December 2022 provides the next 2 years of analysis and includes RAAF Base WLM, Tindal, Darwin, Townsville and Amberley. Please refer to link: <a href="#">Flying operations of F-35A aircraft   About   Defence</a> and turn to Sections 5 – 5.5, 5.6.1 and 5.6.2, or pages 63 – 76; and Appendices E to I pages 89 to 148.</p> <p>3c. Defence operates a Noise and Flightpath Monitoring System across a number of bases across Australia to monitor aircraft noise from military operations. Defence has reported NFPMS data to local communities since 2005. Noise monitoring occurs at RAAF Bases WLM in New South Wales, RAAF Bases Amberley and Townsville in Queensland and RAAF Bases Darwin and Tindal in the Northern Territory.</p> <ol style="list-style-type: none"> <li>The F-35A Biennial Reporting - Noise and Flight Path Monitoring System (NFPMS) Review published in 2021 included an investigation of alternative noise measurement and analysis methods. For reference go to Pages 36 - 52, section 4.3 – 4.3.6. The review found that the system was designed as a fit for purpose model required for monitoring noise for military fast jets.</li> <li>Noise monitoring terminals were installed at RAAF Bases Tindal over the period November 2021 to January 2022. The NFPMS data is used to produce monthly and annual noise reports for flying operations for RAAF Bases Tindal. Aircraft noise reporting can also be accessed through Defence's</li> </ol> |

| Condition Number / Reference | Condition                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Is the project compliant with this condition? | Evidence / Comments                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|                              | <p>aircraft noise levels with those predicted in the Environmental Impact Statement; and</p> <p>iv. Biennial review of noise monitoring locations, unless agreed with the Minister.</p> <p>d) If actual measured F-35A Lightning II aircraft noise levels, and flight activity exceed those predicted in the Environmental Impact Statement then corrective action be developed and implemented at RAAF Base(s) and forward operating RAAF Base(s), until an appropriate assessment of noise levels and flight activity has been reached, as agreed with the Minister.</p> |                                               | <p>interactive webpage reporting system – see link: <a href="#">Defence Aircraft Noise: Department of Defence</a>. To limit non noise related data being released, in 2022 Defence moved from using direct radar input to a secondary feature of the NFPMS contract using an alternative ID system through frequency (Spectral) recognition IA software to identify the jets. This has commenced with an encouraging degree of accuracy and has begun to inform reports. Spectral identification allows Defence to identify F-35A aircraft noise from the data collected.</p> <p>iii. Comparisons were documented in the F-35A Noise and Flight Path Activity January 2021 - December 2022. The details can be found at <a href="#">Flying operations of F-35A aircraft   About   Defence</a> - Pages 48-50, Section 5.2 – 5.5 and Appendices E - I. The findings of F-35A Noise and Flight Path Activity January 2021- December 2022 indicate that flying operations and noise level changes associated with the F-35A aircraft are generally consistent with the EIS. Further detail can be found at Section 5 – 5.5, or appendices E to I.</p> <p>iv. Noise monitoring locations were reviewed in F-35A Biennial Reporting - Noise and Flight Path Monitoring System Review, refer page 38, Section 4.3.4. There were no recommendations for changes to the siting of noise monitoring locations, beyond provision of mobile noise monitors in specific locations if required (refer to response in condition 3.c.ii)</p> <p>3d: Air Force has conducted considerably less flying activity since the introduction of the F-35A at RAAF Base WLM than identified in the EIS. This will be the case until squadrons reach full capacity. The first F-35A aircraft arrived at RAAF Base Tindal on 3 December 2021. Aircrafts will be gradually introduced until the end of 2024.</p> <p>The findings of F-35A Noise and Flight Path Activity January 2021 - December 2022 indicate that flying operations and noise level changes associated with the F-35A aircraft are generally consistent with the EIS.</p> <p>Air Combat Group (ACG) trialled alternative departure procedures at RAAF Base WLM from mid-2019. The aim of the trials, conducted in accordance with the RAAF Base WLM Aircraft Noise Management Plan (Enc.1) F-35A NFAVP, is to identify procedures that do not compromise the safe operation of the F-35A aircraft, the safety of the public and aircrew, and minimise noise at sensitive receivers, while still achieving training and operational requirements.</p> <p>The noise test program was designed to be carried out from the first flying operations of the F-35A aircraft in Australia as from January 2019 through to December 2022. Phase 5 of the verification program involved continued monitoring and comparison at RAAF Base WLM and Salt Ash Air Weapons Range. Building on the information gained as a result of the extensive noise verification program at RAAF Base WLM in 2021-22. Defence provided this data in the biennial report published in July 2023. Utilising this data, ACG will finalise operating procedures throughout 2023-24 with the objective of minimising aircraft noise as much as possible without comprising operations or safety. Defence may look to replicate this departure profile where the benefits can be realised at RAAF Base Tindal and other forward operating bases where applicable.</p> <p>Flying activity and noise levels were monitored throughout 2022 to assess the success of the revised departure profile in minimising noise within safety and operational constraints. The details of the 2021-22 noise</p> |

| Condition Number / Reference | Condition                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Is the project compliant with this condition? | Evidence / Comments                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|                              | <p>noise levels and flight activity monitoring data that addresses community concerns in an easily understandable manner for the lay person.</p> <p>g) Complaint Handling and Resolution, to ensure enquiries and complaints about F-35A Lightning II aircraft flying operations are received, recorded, reported, responded to and resolved, as defined in the Aircraft Noise Management Strategy.</p> <p>The plan must be submitted to the Department for approval. The approval holder must not commence the action unless the Minister has approved this plan.</p>                                                                                                                                                                                                                                                                                                                                                                                                                 |                                               | <p>consultation activities is available in Attachment B.</p> <p>iv. Defence maintains location-specific information about F-35A Lightning II EIS predictions on the Defence website (refer to Biennial Reports). Defence also provides access to actual aircraft noise levels and flight activity monitoring data on the Defence website. See <a href="#">Flying operations of F-35A aircraft   About   Defence</a>.</p> <p>3g: Defence maintains robust complaint handling systems under Enclosure 1 of the RAAF bases WLM BANMP, Tindal BANMP, Darwin BANMP, and Amberley BANMP. Complaints are recorded as advised in the BANMPs and in accordance with the RAAF Aircraft Noise Management Strategy.</p> <p>The BANMPs were approved by the then Department of Environment and Energy delegate upon completion of the first NMP beginning with RAAF Base WLM on 3 December 2018. All BANMPs have undergone subsequent documented reviews annually or when required. The BANMPs can be found at: <a href="#">Flying operations of F-35A aircraft   About   Defence</a>.</p> <p>Compliance with this condition is supported by actions taken to satisfy conditions 1, 2 and 4.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| b4                           | <p>Prepare and implement a Fauna Management Plan. This plan must include, but not be limited to:</p> <p>a. Establishing a baseline measurement of noise levels at environmentally sensitive locations prior to the flying operations of the F-35A Lightning II aircraft;</p> <p>b. Measurement of noise levels at environmentally sensitive locations during the flying operations of the F-35A Lightning II aircraft;</p> <p>c. If measured F-35A Lightning II aircraft noise levels exceed the baseline measurement of noise levels at environmentally sensitive locations prior to the flying operations of the F-35A Lightning II aircraft, then corrective measures must be developed and implemented until an appropriate assessment of noise impacts is reached, as agreed with the Minister; and</p> <p>d. Reporting the results of noise level measurements to ensure data is publically available.</p> <p>The plan must be submitted to the Department for approval. The</p> | Compliant                                     | <p>The Fauna Management Plan (FMP) was approved by the DCCEEW Delegate on 10 March 2016 and includes all elements of Condition 4 measures.</p> <p>Activities undertaken to implement the FMP in conformance with Condition 4 include:</p> <p>4a: Locations for baseline measurement of noise levels at environmentally sensitive locations prior to the flying operations of the F-35A Lightning II were selected in accordance with FMP siting requirements. The baseline measurement of noise levels was conducted during from 2 November 2018 to 23 January 2019. The baseline noise level and fauna observation report was finalised in March 2019 and submitted to DCCEEW on 19 April 2019.</p> <p>4b: Transition Period measurements of noise levels at environmentally sensitive locations were undertaken during September to November 2019. The F-35A Aircraft Noise Effects on Fauna – Impact Assessment Results Report is available on the Defence website at <a href="#">F-35A Aircraft Noise Effects on Fauna – Impact Assessment Results Report</a>.</p> <p>4c: As documented in the Fauna Management Plan, the Impact Assessment Results Report assessed whether F-35A Lightning II noise levels exceed the baseline measurements. No issues were identified to specific animal populations. As a result of the ongoing noise verification trials, Defence will consider the results as part of evaluating whether any corrective measures must be developed and implemented once the transition period is complete in 2023. The biennial reports will continue to inform this assessment.</p> <p>4d: Defence published the Fauna Management Plan to the Defence website in March 2018. The F-35A Noise effects on fauna – Baseline Report April 2019 was published on 5 March 2020. The F-35A Noise Effects on Fauna – Impact Assessment Results report was published on 6 March 2020.</p> |

|                                  | approval holder must not commence the action unless the Minister has approved this plan.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Administrative conditions</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 5                                | Within 10 days after the commencement of the action, the person taking the action must advise the Department in writing of the actual date of commencement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Compliant                                     | Commencement of the action occurred on 10 December 2018.<br><br>On 14 December 2018, the then Department of Agriculture, Water and the Environment acknowledged receipt of notification that the actioned commenced.                                                                                                                                                                                                                                                                                                                        |
| 6                                | The person taking the action must maintain accurate records substantiating all activities associated with or relevant to the conditions of approval, including measures taken to implement the management plans, reports and strategies required by this approval, and make them available upon request to the Department. Such records may be subject to audit by the Department or an independent auditor in accordance with section 458 of the EPBC Act, or used to verify compliance with the conditions of approval. Summaries of audits will be posted on the Department's website. The results of audits may also be publicised through the general media.                         | Compliant                                     | Records are maintained in accordance with Commonwealth record keeping policy using the Defence information management system known as Objective.                                                                                                                                                                                                                                                                                                                                                                                            |
| 7                                | With three months of every 12 month anniversary of the commencement of the action, the person taking the action must publish a report on its website addressing compliance with each of the conditions of this approval, including implementation of any management plans, reports and strategies as specified in the conditions. Documentary evidence providing proof of the date of publication and non-compliance with any of the conditions of this approval must be provided to the Department at the same time as the compliance report is published. The person taking the action must continue to publish the annual report until such time is agreed in writing by the Minister. | Compliant                                     | Commencement of the action occurred on 10 December 2018.<br>The first annual compliance report covers the period 10 December 2018 to 9 December 2019.<br>The second annual compliance report covers the period 10 December 2019 to 9 December 2020.<br>The third annual compliance report covers the period 10 December 2020 to 9 December 2021.<br>The fourth annual compliance report covers the period 10 December 2021 to 9 December 2022.<br>The fifth annual compliance report covers the period 10 December 2022 to 9 December 2023. |
| 8                                | Upon the direction of the Minister, the person taking the action must ensure that an independent audit of compliance with the conditions of approval is conducted and a report submitted to the Minister. The audit must not commence unless independent auditor must be approved by the Minister prior to the commencement of the audit. Audit criteria must be agreed to by the Minister and the audit report must address the criteria to the satisfaction of the Minister.                                                                                                                                                                                                            | Not applicable                                | To date, no requests for an audit have been received.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 9                                | The approval holder may choose to revise a management plan approved by the Minister under conditions 3 and 4 without submitting it for approval under section 143A of the EPBC Act, if the taking of the action in accordance with the revised plan would not be likely to have a new or increased impact. If the approval holder makes this choice they must:<br>i. notify the Department in writing that the approved plan has                                                                                                                                                                                                                                                          | Compliant.                                    | In accordance with Condition 3, BANMPs are revised or updated annually or as required, then submitted to DCCEEW and uploaded to the Defence Aircraft Noise website.<br><br>All plans can be found at <a href="#">Flying operations of F-35A aircraft   About   Defence</a> .                                                                                                                                                                                                                                                                |

| 10                           | The approval holder may revoke their choice under condition 9 at any time by notice to the Department. If the approval holder revokes the choice to implement a revised plan, without approval under section 143A of the Act, the plan approved by the Minister must be implemented.                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Not applicable                                | Noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 11                           | <p>If the Minister gives a notice to the approval holder that the Minister is satisfied that the taking of the action in accordance with the revised plan would be likely to have a new or increased impact, then:</p> <p>i. Condition 9 does not apply, or ceases to apply, in relation to the revised plan; and</p> <p>ii. The approval holder must implement the plan approved by the Minister.</p> <p>To avoid any doubt, this condition does not affect any operation of conditions 9 and 10 in the period before the day the notice is given. At the time of giving the notice the Minister may also notify that for a specified period of time that condition 9 does not apply for one or more specified plans required under the approval.</p> | Not applicable                                | Noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 12                           | Conditions 9, 10 and 11 are not intended to limit the operation of section 143A of the Act which allows the approval holder to submit a revised management plan to the Minister for approval.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Not applicable                                | Noted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 13                           | If, at any time after ten years from the date of this approval, the person taking the action has not substantially commenced the action, then the person taking the action must not substantially commence the action without the written agreement of the Minister.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Compliant                                     | Commencement of the action occurred on 10 December 2018.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 14                           | Unless otherwise agreed to in writing by the Minister, the person taking the action must publish all management plans, reports or strategies referred to in these conditions of approval on their website. Each management plan or report must be published on the website within one (1) month of being approved.                                                                                                                                                                                                                                                                                                                                                                                                                                     | Compliant                                     | <p>The following management plans and reports have been published to the Defence website within the specified timeframe:</p> <ul style="list-style-type: none"> <li>• RAAF Base WLM BANMP</li> <li>• F-35A Noise and Flight Path Activity</li> <li>• F-35A Biennial Reporting - Noise and Flight Path Monitoring System Review</li> <li>• RAAF Base Darwin BANMP.</li> <li>• RAAF Base Townsville BANMP</li> <li>• RAAF Base Tindal BANMP</li> <li>• RAAF Base Amberley BANMP</li> </ul> <p>All reports can be found at <a href="#">Flying operations of F-35A aircraft   About   Defence</a>.</p> |

Details can be found on the Defence Aircraft Noise website – see link <a href="#">Air bases   About   Defence</a> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 2-M06 | Comply with noise complaint handling procedures as specified in Defence instructions.<br><br>[WLM, TDL, DAR, TVL]                                                               | <b>Ongoing.</b> Condition met through application of RAAF Base Williamtown Aircraft Noise Management Plan (BANMP). Base NMPs for TDL, DAR and TVL apply a consistent approach to complaint handling procedures in accordance the Air Force Aircraft Noise Management Strategy, and is adopted across all base noise management plans.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 2-M07 | Adopt a 60% thrust setting during climb, as a standard procedure where training and operational requirements and flight safety circumstances allow.<br><br>[WLM, TDL, DAR, TVL] | <p>In preparation for the commencement of F-35A operations at Williamtown, Air Force adopted a 60% engine thrust required (ETR) setting as a planned standard procedure, as documented in the approved RAAF Base Williamtown Base Aircraft Noise Management Plan of December 2018.</p> <p>In early 2019, shortly after commencement of the first F-35A operations at Williamtown, it became clear that the F-35A could not safely depart the airfield in 60% ETR setting. In late 2019, after 10 months of trialing various departure profiles, Air Force concluded that flight safety is compromised and a safe departure profile cannot be achieved at 60% ETR setting.</p> <p>Throughout 2019-2022 transition period, Air Force trialed F-35A departure profiles aiming to develop suitable profiles to minimise the impacts of aircraft noise, whilst ensuring training and operational requirements, and safe operations of the aircraft are maintained. The biennial noise reports, F-35A Noise and Flight Path Activity December 2018-December 2020, and December 2020-December 2022 published in July 2021, 2023 respectively documents the outcomes of the operational changes.</p> <p>In 2022-23, Air Force flew specific profiles and conducted stringent ongoing noise monitoring to assess the success of this corrective measure in accordance with Condition 1 and Condition 3.</p> <p>The outcomes of the trials – stage four of the five stage Noise and Flight Activity Verification Program (an enclosure of the RAAF Base Williamtown Base Aircraft Noise Management Plan) were published in the 21-22 biennial reports.</p> |

|  |       |                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|  |       |                                                                                                           | <p>Noise monitoring as reported in the Noise and Flight Path Activity 2021-22 Report, indicated flying operations and noise levels associated with the F-35A aircraft are generally consistent with the findings of the EIS.</p> <p>There were some instances of higher measured noise levels around RAAF Base Williamtown, summarised as follows:</p> <ul style="list-style-type: none"> <li>• At locations around Raymond Terrace, F-35A aircraft noise levels were higher than the EIS predictions. F-35A aircraft maximum departure noise levels were lower than the previous biennial report period (2019-2020), demonstrating improvements as a result of testing which changed the departure profiles aimed at increasing the altitude of departing aircraft. This activity has resulted in noise levels comparable to previous measured F/A-18A/B Hornet noise levels; and</li> <li>• In areas east of the base, F-35A aircraft arrival noise levels were higher than the EIS predictions. However, the number of aircraft events in these areas were relatively low. This outcome was also a feature of the previous biennial report period (2019 – 2020) and reflected in F/A-18A/B Hornet measured noise levels that were higher than EIS predictions. Accordingly, this can be attributed to a systematic difference between the way arrivals occur in practice and that the modelling of these procedures in the EIS.</li> </ul> <p>The details can be found at <a href="#">Flying operations of F-35A aircraft   About   Defence</a> - Pages 48-50, Section 5.2 – 5.5 and Appendices E to H. The findings of F-35A Noise and Flight Path Activity January 2021- December 2022 indicate that flying operations and noise level changes associated with the F-35A aircraft are generally consistent with the EIS. Further detail can be found at Section 5 – 5.5, or appendices E to H.</p> <p>In accordance with the RAAF Base Williamtown BANMP, Defence bedded down the corrective measures in 2022-23. Standard operating procedures are to be finalised in 2023/24 as per the approved RAAF Base WLM BANMP F-35A NFAVP once all aircraft are introduced into service.</p> <p>Please see <a href="#">Air bases   About   Defence</a>, go to Williamtown, or other relevant bases such as Tindal, Darwin, Townsville and Amberley</p> |
|  | 2-MO8 | Limit afterburner take-offs to only those that are required for training, operational and safety reasons. | <p>In accordance with condition 3, F-35A Lightning II aircraft only conduct afterburner takeoffs when required for safety reasons or for specific noise mitigation activities currently conducted at RAAF Base Williamtown.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|  | 2-S02 |  | Maintain a Memorandum of Understanding (MOU) with the Aircraft Noise Ombudsman (ANO) to independently review F- 35A aircraft noise management and complaint handling. | Defence agreed an MOU with the Aircraft Noise Ombudsman in January 2015. The MOU remains current.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|  | 2-S03 |  | Introduce new noise abatement procedures for RAAF Base Williamtown in October 2014.                                                                                   | <b>Complied 2014.</b> Noise abatement procedures were implemented at RAAF Base Williamtown in October 2014.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | 2-S04 |  | Conduct additional noise assessments at child care centres on RAAF Base Williamtown, RAAF Base Darwin, and RAAF Base Amberley.                                        | <b>Not required.</b> Noise testing at childcare centres at RAAF Bases Amberley, Darwin and Williamtown took place in late August 2015. In September 2015, Defence advised parents that the initial results of noise testing research had not alleviated Defence’s concerns. Given the assessed health and safety risk to children, Defence closed affected centres. See link: <a href="#">Defence Aircraft Noise : Department of Defence</a> for Defence reports.                                                                                                                                                                                                                 |
|  | 2-S05 |  | Investigate engineering options that would provide practical solutions to reduce the exposure of children on RAAF bases to aircraft noise.                            | <b>Not required.</b> Defence investigated engineering options for practical solutions to reduce the exposure of children on RAAF Bases to aircraft noise in January 2015. In September 2015, Defence advised parents that the initial results of noise testing research had not alleviated Defence’s concerns. Given the assessed health and safety risk to children, Defence closed affected centres.                                                                                                                                                                                                                                                                            |
|  | 2-S06 |  | Provide updated noise information for the F-35A aircraft as it becomes available, particularly information on the noise from cannons.                                 | Noise information for the F-35A has been made available via the Environmental Impact Statement.<br><br>F-35A Lightning II use of SAAWR has been minimal since aircraft introduction in 2018.<br><br>On 7-Oct-2021, two F-35As used the SAAWR, including the use of gunnery, between 2-2.30pm. There was a total of 18 passes of the SAAWR, seven of these involved the use of cannons. From the data noise monitoring terminals recorded, noise from the cannons can be heard separate to the aircraft for approximately one second. The noise is no louder than the noise from the aircraft.<br>At noise monitors located in Salt Ash and Medowie and Lemon Tree Passage, cannon |

|--|-------|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  |       |  |                                                                                                                                                                                    | noise is heard, but is not recorded separately to the aircraft. When compared with historic F/A-18A/B Hornet noise data at SAAWR, the noise levels for F-35A are slightly higher. However due to limited operations, the data source is limited until F-35A aircraft use of SAAWR more often. This remains the single source of data.              |
|  | 2-S07 |  | Continue publication of noise and flight path monitoring data for RAAF Base Williamtown, RAAF Base Darwin, and RAAF Base Townsville on the Defence Aircraft Noise website.         | Defence continues to publish noise and flight path monitoring data for RAAF Base Williamtown, bed RAAF Base Townsville. RAAF bases Tindal and Darwin noise monitoring began as from November 2021. Go to <a href="#">Defence Aircraft Noise: Department of Defence</a> for information on the Noise and Flightpath Monitoring System and reporting |
|  | 2-S08 |  | Maintain and continue to participate in forums for community consultation such as the Williamtown Advisory Group and the Darwin International Airport Community Consultation Group | Defence continues to participate in a number of forums for community consultation, include the Williamtown Advisory Group and the Darwin International Airport Community Consultation Group. Senior Australian Defence Force Officers continue to organise and/or attend forums on a regular basis.                                                |

## 2023 ANNUAL COMPLIANCE REPORT – F-35A LIGHTNING II FLYING OPERATIONS

### Attachment B – Consultation and Notices - 2023

#### Community Consultation and Engagement

Defence continues to consult stakeholders regarding flying operations, compliance with approved flight paths, operational controls and future plans. The key groups include: - Williamstown Advisory Group (up to 2 meetings each year); Darwin International Airport Community Consultation Group (up to 3 meetings each year); Amberley Consultative Group (up to 5 meetings each year); and Townsville Community Aviation Consultation Group.

#### Air Force Advisories

Air Force issues social media posts associated with all exercises and flying activities as well as posting flying activity on the Flying Operations page - <https://www.airforce.gov.au/operations/flying-operations/flying-activity>. This link is displayed at the bottom of every media release and noise mitigation/information social media post.

In addition to the ongoing advisories, public information is distributed to local residents via public affairs campaigns to support the extensive deployment/exercise training requirements that occur around Australia for military fast jet flying operations.

For example, publicity campaigns were associated with two major Australian Defence Force exercises at RAAF Bases Darwin and Tindal since late May 2022.

Public information activities occurred to inform local residents of the nature and extent of the impacted operations.

#### Local notifications

RAAF Base Williamstown local flying notifications are issued on a regular basis to local, state and federal government representatives. Notification are also issued to advise Williamstown Advisory Group members and local residents of non-routine flying activity, or specific announcements such as low passes over the Base where possible.

RAAF Bases Amberley, Darwin and Townsville have developed stakeholder email contact points to distribute information for exercises.

In excess of 44 local advisories/updates were issued in 2023 designed to keep people informed of RAAF Base WLM or SAAWR flying activities.
