

The following table provides the number of permits approved by Defence Export Controls (DEC), for the exportation of goods and technologies on the Defence and Strategic Goods List (DSGL) to Israel, the United States of America (USA), and the United Kingdom (UK) between 1 January 2023 to 6 October 2023 and additionally between 7 October 2023 to 29 February 2024.

Permit approvals should not be confused with weapons sales. Export permits are required for a wide range of goods and technology, many of which are used for civilian and commercial purposes. This includes where items must return to their original manufacturer for repairs.

Permit approvals should also not be confused with completed exports, as there is no requirement to complete an export once a permit is issued.
