

CAPABILITIES BEING SOUGHT

LAND, SEA, AIR, SPACE DOMAINS
DESIGN, MODELLING, MANUFACTURE, TEST OR SUPPORT

TECHNOLOGIES RELATED TO:

- Advanced sensors
- Spectrum products
- ISR products and core technologies across the spectrum
- Autonomy / AI and ML for collaboration and decision support
- High assurance and resilient networks
- Advanced materials suitable for military / aerospace applications
- Advanced production techniques for complex products
- MRO and data analysis in the Sustainment space
- Future missile and effector products and components
- Battlefield applications

ELECTRONIC COMPONENTS

- Battery technologies
- Power management
- Capacitors
- Power supplies
- Micro-electronics
- Electro-optics
- Printed wiring board manufacture
- Circuit Card assembly

ENERGETIC MATERIALS

CABLE ASSEMBLIES

RF / MW SYSTEMS & COMPONENTS

- Transmitters, receivers and transceivers
- Major & minor RF/mW Components
- Antenna

METAL PRODUCTS

- CNC machining
- Casting
- Forging
- Forming
- Metal injection moulding
- Treatments & coatings
- Inspection & testing
