

SAAB

CAPABILITIES BEING SOUGHT

Saab Australia's Global Supply Chain Team is seeking the following exportable technologies, products and services

SPACE

- Vertical Launch/Lift
- Bus and payload providers
- Space based sensing capabilities
- Multi spectral sensor capabilities
- Space domain awareness
 - Fusion and SDA curation algorithms
 - Ground based and space Sensor data
 - Modelling and Simulation products and or services

AUTONOMOUS SYSTEMS

- Command and Control
- Drone Combat Support & Targeting
- UxV Autonomy

ELECTRONIC WARFARE

- Electronic Component Manufacture
- Microwave modules

SENSORS

- Radar Components
- Laser Range Finding
- IR Camera
- Ruggedised, military-grade computer processing systems
- Ruggedised tactical Switches
- Electronic circuit boards (PCB)
- Antennas

WEAPONS/ COUNTERMEASURES

- C-sUAS
- Hypersonics
- Directed Energy Weapons

DEPLOYABLE INFRASTRUCTURE

- Portable power generation and distribution systems

SIGNATURE MANAGEMENT

- Multispectral Signature Reduction Materials
- Fabric manufacturing

MANUFACTURING

- Titanium Forgings
- Raw Explosives
