

PFAS Williamtown Working Group Key Updates from 20 November 2025 meeting

Members agreed to the Terms of Reference and the Work Plan to progress actions to mitigate PFAS contamination from RAAF Base Williamtown.

Defence presented the approach to develop a flood action plan to support improved coordination and management of the local drainage network. This flood action plan is due for completion by September 2026.

Implementation of agreed actions from the work plan by owners of drainage infrastructure will improve the performance and maintenance of the drainage network.

On 11 December 2025, several Williamtown Working Group members attended a field inspection of drains south of RAAF Base Williamtown, to validate current mapping of the drains and discharge points.
