Public AIC Plan

Company Name	StandardAero (Australia) Pty Ltd
Location	3 Sir Thomas Mitchell Rd, Chester Hill, NSW, 2162
General Contact Detail	Tel + 61 2 87070000

Executive Summary

StandardAero is providing the Propulsion System Maintenance Support solution to the Commonwealth's C-130J, AP-3C and C-27J Aircraft. StandardAero is a global leader in Aircraft Engine Repair, Overhaul, Engineering and Material Supply functions and will fully integrate the C-130J, AP-3C and C-27J Propulsion Systems into our extant network services supported in Australia.

StandardAero Ltd has been contracted by the Commonwealth to deliver five years of Support, Maintenance and Engineering Services, with options to extend, subject to positive Performance Reviews.

Specifically, the scope of the Contract can be summarised as:

- Technical Support Services;
- Supply Support Services;
- Deeper Maintenance Services;
- Engineering Services;
- Training and Mentoring; and
- Disposals

The support contract price is approximately AUD 135M, with approximately AUD 47M delivered by Australian Industry.

Details of the Australian Industry Involvement are included in Table 1 below:

Table 1 – Australian Industry Work

Australian Company Performing the Activity	Local Industry Activity	Location of Work
StandardAero (Australia) Pty Ltd	C-130 J and C-27J Propulsion System Maintenance, Repair and Overhaul, Engineering Support, Technical Support, Supply Support	RAAF Base Richmond, NSW

Airbus Group Australia Pacific	AP-3C Propulsion System Maintenance, Technical and Supply Support	RAAF Base Edinburgh, SA
StandardAero (Australia) Pty Ltd	Accessories Repair and Servicing, Non Destructive Testing, General Machining	Chester Hill, NSW

Key Offerings for Australian Industry

StandardAero is committed to retaining and growing our in-country support capability and expanding our local support network for the Deeper Maintenance of Propulsion System items on the Commonwealth's C-130J, AP-3C and C-27J fleets; including the Repair and Overhaul of Components and Accessories, Engineering and Training Services, and Logistical Support.

Scope of Future Work Opportunities

Due to Original Equipment Manufacturers, Intellectual Property (IP), Licensing and ITAR restrictions and the very small quantity of product being processed, there are limited opportunities for increased Australian Industry participation. However, StandardAero will test the market for other suppliers as current arrangements come to a conclusion or new scope or product improvement changes occur.

Where a change of, or new supplier is required StandardAero conducts a needs analysis and carries out a market analysis to consider potential Suppliers. From this process StandardAero will carry out a formal tender process to find a suitable Supplier; assessment will include:

- Capability within Australia to meet the requirement;
- Quality System;
- IP, Design and Certification System; and
- Capacity to meet the requirement

Industry Engagement

Australian Industry may register interest in support of our current capabilities or in future opportunities by contacting the StandardAero (Australia) Pty Ltd Representative.
