Executive Summary

CSC has been contracted by the Department of Defence to provide a single cohesive finance sustainment capability to support the Defence Finance System.

The scope of services provided under the Contract include Sustainment Support, Minor Enhancements and related Service Management activities for the Defence Finance suite of applications.

The overall value of the contract is $35 million AUD over 5 years, with intended industry elements representing $35 million AUD or 100% of contracted work. Under the contract, CSC will conduct all work within Australia. The Australian industry participants for the Finance Sustainment contract are detailed in Table 1 below.

NTT Data Business Solutions Pty Ltd  
KINGSTON ACT*                                                                 | Canberra         |

Key Offerings for Australian Industry

CSC is committed to establishing and maintaining an in-country capability for SAP Finance Systems sustainment. As such, CSC has implemented:

- A resourcing strategy aimed at CSC and Australian SME employees; and
- A subcontractor strategy – aimed at engaging local SAP BI/BW expertise via subcontract.
Scope of Future Work Opportunities

CSC regularly undertakes a capability gap analysis to identify significant deficiencies in delivering the contracted solution. CSC has largely filled these gaps through the engagement of Australian employees, although additional opportunities for Australian industry participation may arise in the future as a result of ongoing capability gap identification.

Future Opportunities / Industry Engagement

Future opportunities for Australian industry participation in the program may arise as it progresses and further requirements are identified.

Australian companies and SMEs with availability of suitable skills are encouraged to register their interest with the CSC Contact Officer and where applicable make representations of their capacity, capability, innovations that they can bring to the program.
